

Arnold Zamora

(732) 874-1732 ❖ arnold.zamora@rutgers.edu ❖ [linkedin.com/in/arnoldzamora](https://www.linkedin.com/in/arnoldzamora)

EDUCATION

Rutgers, The State University of New Jersey

Expected Graduation: May 2029

Bachelor's of Science, Electrical and Computer Engineering

New Brunswick, NJ

- Honors & Activities: Goldman Sachs Possibilities Series, AWS AI/ML Scholar, IEEE, RUBreaks
- Relevant Coursework: Intro to Engineering, Engineering Mechanics: Statics, Physics I & II, Calculus I-III

Edison High School

Class of 2025

Graduate

Edison, NJ

- Co-President of EHS DECA with 300+ members and 100+ hours, and Chair Member of 2025 Class Council

EXPERIENCE

Frontend SWE Fellow *Rutgers Blueprint*

Feb. 2026 – Apr. 2026

- Completed 8-week fellowship in frontend development, deploying dynamic web applications to GitHub Pages
- Utilized React, JavaScript, and CSS Flexbox/Grid to deliver dynamic, practical, and user-friendly interfaces
- Communicated complex program logic and engineering thought processes during a final project showcase
- Implemented client-side routing, utilizing React Router and the Virtual DOM to build single-page applications

District Youth Coordinator *Bukas Loob sa Diyos (BLD) Newark*

Jan. 2024 – Jan. 2025

- Led the Youth ministry of BLD Newark in event planning, budgeting, and ministry management
- 200+ hours committed towards community service within BLD through events, retreats, and outreach
- Fundraised \$4000+ towards the 29th Youth Encounter retreat, and managed a team of 50+ volunteers
- Facilitated the 30th Youth Encounter retreat with 20+ participants over the course of 3 days

AI Intern *DeAP Learning*

Jan. 2024 – Mar. 2024

- Chunked informational data of language learning models for a developing project in AI-education
- Closely worked under an experienced mentor and the CEO of the company to engineer AI prompts
- Wrote and proofread functions, classes, and other code in Python for AI and machine-learning applications
- Collaborated with a team of 3 other programmers to chunk data and debug programs successfully

PROJECTS

Event Planning Site | *HTML, CSS, JavaScript, React, Google Calendar API*

Feb. 2026 – Apr. 2026

- Utilized React and implemented OAuth 2.0 with the Google Calendar API for real-time availability visualization
- Architected a discovery engine with Ticketmaster API and RESTful API responses to render filtered event data

Heat Transfer Analysis Program | *MATLAB, Data Visualization, Image Analysis*

Jan. 2026 – Apr. 2026

- Developed a program to process thermal imagery via linear interpolation and automated row-averaging
- Evaluated thermal resistance across materials and performed error analysis to quantify heat loss deviations

Python-Based Racial Detection | *Python, DeepFace, OpenCV, Machine Learning*

Nov. 2023 – Dec. 2023

- Developed a facial analysis application with over 95% accuracy to classify demographic data
- Programmed a sub-second latency image processing pipeline to analyze facial attributes from local files

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, HTML, CSS, JavaScript, MATLAB
- **Frameworks:** React, Vite, React Router, Tailwind CSS, Git, Vercel, Google Cloud, OAuth 2.0
- **Skills:** Communication, Teamwork, Adaptability, Time Management, Multi-Tasking, Organization
- **Interests:** ML/AI, Computer Vision, Robotics, Software, SWE, Frontend, Fullstack
